

NGUYEN DOAN TU

FRONT-END DEVELOPER → FULL-STACK

doantufptu@gmail.com | +84 969 876 218 | linkedin.com/in/doan-tu | Ha Noi, Vietnam

Front-end software engineer with **5+ years** building scalable, high-performance web applications with Vue.js, Nuxt.js and React.js. Strong in TypeScript, state management, modular architecture and UI consistency, with a track record of leading front-end architecture and mentoring developers in Agile teams. **Now expanding into the backend with Node.js and NestJS — my goal is to own products end-to-end as a full-stack developer.**

CORE SKILLS

Frontend	Vue.js, Nuxt.js (Nuxt 2 & 3), React.js, Next.js, React Native
Backend <i>(growing)</i>	Node.js, NestJS, REST APIs — <i>actively learning: database & system design</i>
Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management	Pinia, Vuex
Architecture	Atomic Design, Component-based Architecture, Modular SPA Design
UI & Styling	TailwindCSS, Element UI, Sass, PostCSS
APIs	REST APIs, GraphQL (Apollo Client)
Collaboration	Scrum / Agile, Cross-functional teamwork, Mentoring, Code review

PROFESSIONAL EXPERIENCE

Xantus — Front-end Software Engineer - Developed and maintained large-scale SPAs using Vue.js, Nuxt.js (Nuxt 3) and TypeScript. - Built reusable base components following Atomic Design principles for UI consistency and scalability. - Led project initialization, architecture setup and codebase refactoring to improve maintainability and performance. - Implemented state management using Vuex and Pinia; integrated GraphQL APIs with Apollo Client. - Developed social platforms and Web3 marketplaces (NFT, GameFi) with complex UI flows. - Applied SEO, accessibility and performance best practices; contributed to front-end architecture decisions. - Collaborated closely with designers, backend engineers and product managers in an Agile environment.	Feb 2022 – Present
CMC Global — Front-end Developer - Developed and maintained SPA features using Vue.js; created reusable components and improved UI modularity. - Supported the PO by creating and reviewing tasks and participating in sprint planning. - Conducted code reviews and supported 4 team members through technical guidance. - Followed ESLint rules and coding standards to ensure consistent code quality.	Feb 2021 – Feb 2022
Mirabo JSC — Front-end Developer - Delivered 10+ web applications using Vue.js, Nuxt.js and React.js. - Built modular UI components and improved application performance. - Participated in project initialization, task assignment and code reviews. - Contributed to mobile applications using React Native, working in Agile teams.	Oct 2019 – Feb 2021
Digital Token — Front-end Developer - Developed web applications using Vue.js, React.js and Nuxt.js. - Contributed to 2 React Native mobile applications. - Gained early experience in SPA architecture and front-end best practices.	Jan 2018 – Mar 2019

SELECTED PROJECTS

Bites bites.xyz Tech: Nuxt 3, TypeScript, Apollo Client, TailwindCSS, Pinia - Led full front-end development and architecture; built a scalable SPA with clean, maintainable code. - Designed modular components and implemented SEO and social interaction features.	Front-end Key Member
Oxalus NFT Social oxalus.io Tech: Nuxt 3, TypeScript, Apollo Client, TailwindCSS, Vuex - Developed a social platform with wallet integrations and analytical dashboards. - Built charts, tables and user interaction flows for NFT analytics with modular Vuex stores.	Front-end Key Member
Oxalus Games hub3.games Tech: Nuxt 3, TypeScript, Apollo Client, TailwindCSS, Vuex - Developed NFT marketplace features: browsing, selling, depositing and withdrawing NFTs. - Integrated multiple Web3 wallets and smart-contract interactions; optimized SPA performance and SEO.	Front-end Key Member
DailyDrama Android app Implemented core UI features for the film catalog and ad logic, with clean, maintainable code.	Kotlin Developer

EDUCATION

FPT University — Software Engineering	2015 – 2019
